Research Concepts and Principles

Literature Review

Systematic Review

- **SUBJECT HEADING:** SYSTEMATIC REVIEW
- **SCOPE:** A specific type of literature review in which a concept is identified and the research which has studied it is analyzed and evaluated. The results of this research are synthesized to present the current state of knowledge regarding the concept. For articles that are systematic reviews or contain systematic reviews, search for document type "systematic review."
- **YEAR of ENTRY:** 1998

Research Methodology

Data Analysis

Meta Analysis

- **SUBJECT HEADING:** META ANALYSIS
- **SCOPE:** The quantitative analysis of two or more independent studies to integrate and synthesize the findings and describe the features of the studies that contribute to variation in their results.
- **YEAR of ENTRY:** 1988

Subject heading: Practice guidelines

- **SCOPE:** Set of directions or principles to assist health care practitioners with patient care decisions about appropriate diagnostic, therapeutic, preventive, or other clinical procedures for specific clinical circumstances. The guidelines may be developed and issued by government agencies, institutions, organizations such as professional societies or governing boards, or by expert panels. Do not confuse with standards of practice which are authoritative statements that describe standards of care, standards of professional performance, and the full scope of professional practice.
- **YEAR of ENTRY:** 1993
